

**Research has shown that employee training reduces turnover and absenteeism because employees prefer to stay where they can grow and develop. Proper use of products increases overall productivity and quality and reduces down time.\***

Ingenix Learning is a comprehensive education and training program that provides opportunities to help Ingenix customers transform their organizations and improve health care through information and technology. Ingenix Learning will:

- Help client organizations and their users maximize their technology investment by initiating appropriate technology implementation
- Train clients to become experts in Ingenix solutions
- Offer a comprehensive curriculum with potential to earn CEU credits from industry-leading organizations

By leveraging the strength of the Ingenix Learning program, your organization can achieve greater expertise and efficiencies.

## Ingenix Product Training Courses

Maximize your Ingenix technology investment with our user-focused product training courses customized to meet the needs of basic, intermediate, and advanced users. Product training courses include step-by-step product demonstrations, presentations, and hands-on user training.

Training should further the employee's career goals, help the company meet its business goals, and enhance the company's odds for success.\*

- Contract Manager™
- Ingenix CareTracker™ PM

## **Role-based Training Courses**

Beyond product training, we provide courses tailored to help promote expertise in specific roles. We offer online training courses for professional coders with the potential to earn CEU credits from the American Academy of Professionals Coders.

## Delivery Methods

We offer onsite client training designed to meet the specific technology requirements of you and your organization. In addition, we offer coding, billing, and reimbursement reference publications, interactive webinars, and learning updates.

You and your staff can supplement the formal training process by attending our annual conferences. The **Health Care Technology Conference** offers hands-on training for innovative technologies and software and the annual **Essentials Coding, Billing, and Compliance Conference** for coding professionals provides information on key issues including regulatory changes, compliance concerns, and latest codes updates for 2009.

For quarterly supplemental training on most products, go to the Ingenix Learning page on [ingenix.com](http://ingenix.com) to determine the appropriate location and time that works for you.
