

INGENIX[®] Learning

ICD-10 Preparedness

The transition to ICD-10 will mean significant changes to your business operations. Start your preparations by signing up for courses today.

Overview

The useful life of ICD-9 is coming to an end after nearly 30 years. ICD-9-CM is not flexible or accurate enough for today's complex health care environment. What's more, the ICD-9-CM procedure code set will run out of codes as early as this year.

Enter ICD-10. It provides detailed information on procedures, allows ample space for capturing new technology and devices, and has a logical structure with clear, consistent definitions. ICD-10 provides a higher degree of specificity in diagnosis codes, which can be used to identify improved practice standards, quality measurements, outcomes measurements and utilization review. And it can improve data collection, thereby establishing the basis for better equity in reimbursement for services while maintaining budget neutrality.

HHS recently extended the ICD-10 implementation deadline to Oct. 1, 2013. However, all health care organizations need to start their preparations as soon as possible.

Ingenix Learning can help prepare your organization for the changeover. Here's what you can learn:

- Preparation strategies for adapting to the changes, identifying opportunities, and anticipating costs
- How to get all departments ready, from Accounting and Coding to IT and more
- Ways to identify and understand the full impact to your organization
- Best practices to implement important changes
- Strategies for helping specific staff members understand how the change will impact their role

All courses are designed by industry experts and cover the functional and technical aspects of the change. Our trainers are subject-matter experts who provide the learning through a variety of formats, from web-based, self-paced, to instructor-led, web-based and regional, classroom options. All at prices that make sense for today.

User-Friendly, Expert Training

We're the industry coding and electronic data interchange experts, offering the knowledge that organizations need to implement the ICD-10 standard. Our instructors are technical experts with years of experience implementing major industry changes such as ICD-10. They provide practical, hands-on training with real-world applications. And you can rest assured that you will participate in a rich and useful learning experience that can make the transition to the IDC-10 standard as smooth as possible.

Functional and Technical Tracks

Ingenix Learning provides opportunities for both technical and business users at health plans, hospital systems, large provider groups, vendors, and government organizations to become well-versed in the ICD-10 transition. Course tracks are

targeted to specific professional categories. In the case of ICD-10, that can mean everything from executives gaining a high-level understanding of the impact of the new standard, to billers getting hands-on experience with the new codes, to IT administrators obtaining comprehensive technical expertise for implementing ICD-10 into their organizations. For courses mapped to specific job titles or categories, see the table below.

Course List

	Delivery Method	Executives	IT	IT Project/ Product Management	Clinical/ HIM/ System Staff	Financial Staff	Biller	Coders	Other Clinical Staff	Clinical Documentation Specialists	Office Managers	Physicians
Impact Assessment of ICD-10 Available May 1, 2009	Web-based training with Recorded Audio		X	X	X	X	X	X	X	X		X
Strategizing for ICD-10 Available May 1, 2009	Instructor-led web conference	X										
An IT Approach for Updating Systems for ICD-10	Instructor-led web-based training		X	X								
Implementing ICD-10: Best Practices	Web-based training			X								
ICD-10: Impact on Financial Systems	Instructor-led web-based training				X	X						
ICD-10: Impact on Billing	Instructor-led web-based training				X		X					
ICD-10: Impact on Coding Systems	Instructor-led web-based training				X						X	
ICD-10: Impact on Documentation & Physician Profiling	Instructor-led web-based training				X				X	X	X	
Understanding & Using ICD-10-CM	Web-based training							X			X	
Understanding & Using ICD-10-PCS	Web-based training							X			X	
Coding with ICD-10-CM	Instructor-led training							X				
Coding with ICD-10-PCS	Instructor-led training							X				
A Clinical Approach to Updating Systems for ICD-10	Instructor-led web-based training				X							
Documenting <Body System> for ICD-10	Web-based training									X	X	X

Timely, Value-Priced Training

If you read the industry press, then you already know that it's time to get moving. The October 2013 deadline isn't as far away as it sounds. That's why we're building our ICD-10 Preparedness curriculum as fast as we can. And we'll add more courses throughout the year based on your needs. Training starts at around \$100 for web-based, self-paced courses. Our web-based, instructor-led courses and regional, classroom options are easy on the budget, too.

About Ingenix Learning

Ingenix Learning is a comprehensive education and training program that provides opportunities for health care professionals to increase their knowledge, enhance their skills, and keep pace with industry trends. The result is a more capable workforce that enables health care organizations to continually improve their services.
